

Rapid Shape presents new Developments in 3D Printing – The D50+ at IDS Cologne

The productive Workhorse for professional Laboratories

Rapid Shape will present the new, extremely fast and large D50+ 3D printer for professional use at IDS 2021, in addition to numerous innovations in its proven product portfolio. The D50+ is Rapid Shape's new workhorse, perfect for producing up to 11 models in one print cycle. As an all-rounder, the system is suitable for all dental indications with high 4K precision.

The large Lab Printer D50+ makes a professional, validated Workflow possible!

The interest of laboratories and dental practices in terms of an efficient printer is great. Validated processes offer security. Tempered material provides additional process stability. Experience, expertise, inventiveness, and passion for new technologies were successfully combined. The result was the new D50+, another modern and highly efficient 3D laboratory printer.

Smart Machines – easy to use thanks to Information in the Knowledge Center

Comprehensive Cloud-Networking makes it possible for the machines to communicate within ongoing processes. Users receive exclusive access to the Rapid Shape Knowledge Center. The Rapid Shape Knowledge Center provides all customers with a wealth of product information, tutorials and downloads that make using the device child's play. Nevertheless, personal support is always on hand to provide quick solutions.

D50+ at the IDS in Cologne

Rapid Shape's D50+ laboratory printer has already been extensively tested with reference customers, and the shipment of first customer orders will start in September 2021 with IDS. Rapid Shape will present the new D50+ at IDS Cologne, Hall 10, Booth B20-C21

Rapid Shape exhibition stand at the IDS 2021 in Cologne

D50+ Features

- Automatic Separation Module
- Automatic Resin Refill unit
- Access to Knowledge Center and personal support
- Material identification (RFID)
- Certified auto-calibration (ACCS)
- Force-Feedback-Technologie

Benefits for D50+ users

- Safety and security
- Better print quality with a 4K projector
- Material and time saving
- Increased productivity due to continuous printing
- Rapid solutions

About Rapid Shape

Rapid Shape is a German company that specializes in the development and manufacture of high-end systems for additive printing. Rapid Shape has positioned itself as one of this industry's leaders through proprietary technology that has set new standards in speed, reliability and precision. Rapid Shape provides solutions for industrial, dental, hearing aid and jewellery markets. Precision, quality and cooperation with sales, material and technology partners distinguishes this company from its competitors.
