

# Rapid Shape and Alliedstar Announce Seamless Software Integration for Streamlined Dental 3D Printing Workflows

**Heimsheim, Germany / Shanghai, China – February 4, 2026** – Rapid Shape GmbH, a leading manufacturer of high-precision 3D printing solutions, and Alliedstar [LM1.1] a trusted provider of intraoral scanners and digital dentistry solutions., today announced the successful integration of Alliedstar's AS Connect software with Rapid Shape's RS Print Studio.

This integration enables dental professionals to seamlessly transfer designs from AS Connect directly to Rapid Shape's ONE, PRO 20, and PRO 30 3D printers with a single click, dramatically streamlining the digital dental workflow.

## Intuitive Design Meets Precision Manufacturing

Founded in 2019, Alliedstar has quickly established itself as a trusted partner for dental professionals, delivering intuitive and reliable digital solutions by advancing technology around clinical demands, which aligns perfectly with Rapid Shape's commitment to streamlining workflows and ensuring unmatched accuracy.

The AS Connect software integration represents a significant advancement in dental workflow efficiency, eliminating the traditional multi-step process of exporting, locating, and importing files between design and manufacturing software. With full model support and one-click STL transfer, dental professionals can now move seamlessly from design completion to print preparation in seconds.

"This integration reflects Alliedstar's focus on simplifying digital dentistry without sacrificing precision," said Guijian Wang, CEO of Alliedstar. "Together with Rapid Shape, we deliver an open, seamless scan-to-design workflow that allows clinics and labs to work faster and with greater consistency."

"This integration with Alliedstar demonstrates our commitment to creating an open, connected ecosystem for dental professionals," said Andreas Schultheiss, Founder and CEO of Rapid Shape. "The seamless one-click transfer from AS Connect to RS Print Studio eliminates workflow friction and reduces the potential for errors."

## Compatible Rapid Shape Systems:

- **ONE:** Entry-level professional 3D printing for clinics and small labs
- **PRO 20:** Technology for Dental 3D Printing Efficiency with Next-Level Speed and Versatility
- **PRO 30:** Powerful, Reliable, Optimized for Dental Lab Printing

## Empowering Dental Professionals Worldwide

The integration addresses the growing demand from dental professionals for streamlined, reliable digital solutions that reduce complexity while maintaining the highest quality standards. By connecting Alliedstar's clinical-focused design software with Rapid Shape's proven manufacturing platform, dental labs and clinics can achieve faster turnaround times, improved consistency, and enhanced profitability.

## Availability and Implementation

The AS Connect to RS Print Studio integration is now available to all users of AS Connect software working with Rapid Shape ONE, PRO 20, and PRO 30 3D printing systems. The integration can be activated through software updates available from both companies.

## About Rapid Shape GmbH

Founded in 2011, Rapid Shape is a leading provider of high-precision 3D printing solutions for the dental, jewelry, hearing aid, and industrial sectors. The company combines German engineering with cutting-edge technology to offer reliable, scalable systems that streamline workflows and ensure the highest accuracy. Rapid Shape stands for innovation, sustainability, and global partnerships, actively shaping the future of 3D printing.

## About Alliedstar
